

Engineer Sebastine Chinonye Omeh

Engr. Sebastine Omeh, the Managing Director/CEO of Hybrid Micro Machines Products Limited, is an Electrical/electronic Engineering graduate of the University of Nigeria, Nsukka. Engr Omeh stands tall today as the pioneer Wind Energy Expert and Inventor in Nigeria. He is also talented and full of innovative ideas.

Hybrid Micro Machines Products Limited - the brainchild of this genius is a Company specialized in modern broadcast and power engineering systems designs, constructions and maintenance services. The Company has built, reactivated, upgraded/serviced/maintained several broadcast/communication installations and power facilities for over 40 Organizations, with Government establishments, the military and reputable private Organisations as Clients, plus numerous Consultancy Services.

Engr Omeh, who, on graduation, simply chose to venture into self-employment, based on perfect knowledge of his field of study, eventually persevered through an extensive research, culminating in the re-invention of Wind Energy - a potential source of clean energy generated without the hazardous carbon emissions. By this feat, Engr Omeh, already with numerous Awards, Honors, Endorsements and Appointments in his kitty, was, at a recent engineering workshop in Enugu, declared the Michael Faraday of Nigeria.
